

CQI Category Criteria and CQI Rules in 3.5

CQI Category Criteria and CQI Rules that utilize the NEMSIS 3.4 fields of **Incident/Patient Disposition** and **Level of Care of This Unit** will need to be updated with the applicable 3.5 fields of **Unit Disposition**, **Crew Disposition**, **Transport Disposition**, **Patient Evaluation/Care**, and **Level of Care Provided by This Unit**. This update is necessary to continue using your existing CQI process. The same principles shown here can be applied to *Validation Rules*, *Incident List Views*, and *Report Writer* criteria.

Additional Reference material for building these criteria can be found at nhfa-ems.com/nhesr in the document named **3.4 – 3.5 Disposition Mapping**.

Procedure

The below screenshots give an example of a change to a CQI Category Criteria that will allow it to pull in 3.5 reports. In this scenario, a criterion had been built to pull in transports where patient care was provided by the service during the transport phase.

Criteria

Crew Member Completing this Report Includes one of these 1Gage, Johnny ; 1Stanley, Hank ; 1Stoker, Mike

or

Shift Equal C

or...

and

Patient Disposition Includes one of these (BLS Care) Pt Eval & Tx in THIS EMS Unit ; (ALS Care) Pt Eval & Tx in THIS EMS Unit ; (ALS Intercept) Pt Eval & Tx in OTHER EMS Unit

and...

or...

This Criteria will no longer bring in calls after the 3.5 update

Criteria

Crew Member Completing this Report Includes one of these Stoker, Mike and...

or

Shift Equal C and...

or...

and

Transport Disposition Includes one of these Transport by This EMS Unit (This Crew Only) ; Transport by Another EMS Unit, with a Member of This Crew ; Transport by This EMS Unit, with a Member of Another Crew or...

and

Crew Disposition Includes one of these Initiated and Continued Primary Care ; Assumed Care from Another EMS Crew or...

and...

or...

Notes

An example Category for assigning a shift to a shift leader for COL review. The use of Crew Member Making Report in criteria

The new criteria uses 3.5 fields to pull in the same typ of calls as the 3.4 criteria
